WEBSITE CREATION USING ANIMATED TOOLS

Objective: The objective of learning this course is to provide a platform to students so that they can develop their skills in this competitive and technological era. In this course, we offer the students a step-by-step guide for creating a full-featured website using some animation software. The course begins with some best practices for creating website basic tools like buttons, banner, graphics and some other interactive tools.

Learning Outcome-

At the end of this course student will be able to create his own -

- Graphic Designs
- Web Pages
- E-learning projects
- Animated Banners
- Animated Presentations
- Implementation to all these using ASP.NET

Course Contents

Unit- I-
